# SUBJECT INDEX

Attachment line, laminar boundary layer near an 266
Autocorrelation function 24
Axially symmetric analogy 223, 236, 274, 277

Black-box analogy 133
Blasius' equation 110
Boundary layer 5
Boundary layer
, equilibrium 119, 122
, downstream stability of 127, 128
, experimental verification of 124
, laminar
, on a yawed cylinder 224, 254, 269
, on a rotating body 224
, stability of 10
, laminar flat plate 9, 97
, laminar three-dimensional,
, axially symmetric analogy for 223, 236
, effect of compressibility on 223, 238, 265
, effect of a cross-flow on 223
, effect of streamline divergence on 223
, equations of 226
, equations of in geodesic coordinates 232
, momentum integral equations of 228
, momentum integral methods for 224, 251
, separation of 223, 240, 248
, similar solutions for 224, 243
, stability of 225, 252
, with a free edge 242
, with suction 225, 240, 266
on a cone, compressible 224, 248
, turbulent 226
, secondary flow in 171
,thickness 6, 100
, transition of 9, 189
, turbulent 5
Boundary layer—*continued*
, basic equations of 6, 153, 156, 272
, boundary conditions for 9, 154
, calculation of 153
, direct problem 153, 173
, inverse problem 153, 179
, numerical 204
, shearing strength in 172
, skin friction in 166
, with roughness 189
, double velocity equations 43
, energy transfer in 47
, equations in mean values for 12
flat plate 96
, calculation of 185
, local similarity of 97, 98, 108
, flow near the wall in 54
, free stream boundary of 52
, in a duct 226, 275, 276
, pressure fluctuations in 10
, correlation function of 32, 33
, measurement of 49
, three-dimensional 225
, virtual origin of 186, 189

Characteristic curves 261
Characteristic surfaces 241
Compressibility correlation 223, 238
Condition of no slip 9
Correlation function
, pressure 32
, space 24
, measurements of 26
, velocity 22
Cross-flow 232, 274, 276

Displacement thickness 16, 136, 163
, of three-dimensional layer 229, 248, 250
Dissipation
, coefficient 184, 185
, energy 182
, viscous 35, 37
Domain of dependence 242, 261
Double velocity equations 43

Eddy 25
, diffusivity coefficient 20
, size of 24, 51, 58, 109
, structure 52
, viscosity 18, 39, 78, 79, 111, 113, 124, 127
, virtual 20, 109
Energy
, balance in laminar boundary layer 118
, balance in turbulent boundary layer 114
, dissipation, integral of 182
, integral equation 154, 225, 252, 253, 266
, thickness 155, 163
, transfer in turbulent boundary layer 47
, turbulent, distribution of 139
Entrainment 85, 89

Form drag 73
Friction velocity 99

Geodesic coordinates 230
Geodesic curvature 227, 237

Intermediate enthalpy 273
Intermittency factor 82–84, 113

Jets
, in outer part of turbulent boundary layer 90, 91
, in sublayer of turbulent boundary layer 66

Kinetic energy, conversion of by turbulent boundary layer 46

Limiting streamline 233–235, 246, 261

Mean flow, momentum equation for 13, 16
Mixing length 18, 19, 37, 54, 78
theorem 18
Momentum equation for mean flow 13, 16
Momentum integral
, equation 16, 185
, method for three-dimension allayer 224, 251, 254, 272
Momentum thickness 14. 16, 104, 163, 205, 208
, of three dimensional layer 229

Pressure
, diffusion 45
, (gradient) parameter 120. 126, 127, 134, 140
Pressure gradient,
, adverse, boundary layer in an 124, 125, 129, 134, 135
, boundary layer in a 70, 73
, favourable or unfavourable 235
, mean value of 14

Range of influence 242, 261
Re-attachment 164
Recovery factor 273
Recovery temperature 273
Roughness distribution 73, 75, 76, 108, 132, 135
, effect on skin friction of 167

Self-preserving flow 98
Self-preserving layer *see* Boundary layer, equilibrium
Separation 14, 124, 129, 130, 137, 145, 146, 164, 205, 223, 240, 248, 287
, criterion for 152
Shape factor 146
Shape parameter 17, 123, 131, 134, 135, 140, 157
, approximate calculation of 209
equation 192, 194–204, 210
Similar solution *see* Boundary layer, equilibrium
, for three-dimensional boundary layer 224, 243, 245
Similarity hypothesis, v. Kármán's 19, 78
, law for roughness 75
, local 98
, theoretical background to 105
Skin friction coefficient,
, local 17, 71, 102, 125, 132, 136, 163, 166, 185, 248, 250, 265, 273
, calculation of 170
, formulae for 166
, total 191
Skin friction drag 36

Space-time iso-correlation surface 31, 33
Spectrum (function) 22, 58
, energy 34, 37, 40
, frequency 40–42
, integrated 34
Stability
, of equilibrium turbulent boundary layer 127
, of laminar boundary layer 10
, of laminar three-dimensional boundary layer 225, 252
of non-equilibrium turbulent boundary layer 137
Streamline coordinates 223
Streamlines
, effect of convergence or divergence of 223, 237, 277
, limiting 233–235, 246
Stress
, Reynolds 13, 16–18, 20, 44, 54, 57, 58, 78, 95, 131, 138, 142, 272
, shear 71, 272, 273
, shearing, cross-wise 235
, distribution of 172
, total, mean value of 13
, wall, mean value of 13
Sublayer 55, 68
, energy balance in 59, 117
, in pressure gradient 73
, jets in 66
, local isotropy of 64
, mean velocity distribution in 76

Taylor's hypothesis 25, 27, 61, 94
Time delay 22
Transition 9, 164, 189, 205
Turbulence
, homogeneous 86
, intensity of 114, 131, 138
, isotropic 47
, locally isotropic 37, 38, 43, 52, 62, 64
, of free stream, influence of 164
, statistical theory of 11
Turbulence front 85
, distortion of 88
Turbulent
, diffusion 45, 93
, exchange coefficient 17
, heat transfer 20
, Prandtl number 20
, shear flow 49

Velocity
, autocorrelation function 24
, correlation function, double 22, 58, 109
, measurements of 26
, defect 99, 101
, law 100
, fluctuations 58
, profile, power law for 157, 159, 176, 274
Viscosity
, eddy 18, 39, 78, 79
, kinematic 8
Viscous superlayer 85
, thickness of 87
Vorticity
, equation 85
, fluctuation 85, 86

Wake, law of 161, 164, 179
Wall
, completely rough 76
, flow near a rough 73
, flow in a turbulent boundary layer near a 54
, hydraulically smooth 75
, law of 55, 66, 70, 80, 99, 127, 131, 146, 164
, with transient roughness 75
Wing
, delta, boundary layer on 237, 239, 268
, slender, boundary layer on 236
, swept, boundary layer on 236
